

Facility Location Area of Operations

THE COMPANY

R.P. Delio & Company is an agile, privately-held consultancy firm, focused on the fields of program and project development, PMO implementation, renewable energy, energy policy, equipment procurement, process engineering and design & construction management. We have the capacity and expertise to build, and to lead, multidisciplinary teams across global locations.

GLOBAL PRESENCE, PACIFIC FOCUS

Our presence extends across the world's time-zones – and we have been able to deliver success for numerous complex projects globally, through our offices and partners in the UK, India, and the United States.

But our strategic focus is very firmly fixed on the Pacific basin, and the unparalleled potential presented by the region's rapid transition towards a clean energy future. From our base in Hawaii we are actively pursuing opportunities across the Oceania region, and especially the South Pacific Islands between Hawaii, Australia and Japan.
