

Process Engineering Services

One of the core set of services that R. P. Delio & Company can offer lies in the field of process engineering – a field characterized by our broadening and deepening set of technical skills and expert knowledge. We have successfully brought to fruition a number of significant projects in this area, building a pragmatic slant into our approaches to process engineering, instrumentation, plant automation, and chemical engineering.

This has earned R. P. Delio & Company an enviable reputation in delivering process engineering solutions across a range industries, including:

- > Semi-conductor Fabrication and Tooling
- > Bulk Chemical Processing
- > Food and Beverage Processing
- > Photolithography & Wet Etching
- > Waste-water Treatment

PROJECTS THAT HAVE DELIVERED

Of the numerous projects that R. P. Delio & Company consultants have been involved, two of the most significant have been:

- > The leading of a full-service Design and Construction program for advanced-technology Fortune 100 clients of a leader in full-service engineering services. The responsibilities handed to R. P. Delio covered **design, strategic, tactical and operational planning**, as well as the implementation of corrective action plans, through appropriate PHA, HAZOP, or FMEA analysis.
- > Selection as Principal Engineer and Project Manager roles, with responsibilities for **developing advanced wet and photo fabrication process technologies**, for BiCMOS and CMOS products. The services provided covered such areas as process discovery, definition and development; materials and equipment selection and procurement; and process design and optimization.

THE R. P. DELIO & COMPANY APPROACH

Our methodologies and tools for project management are guided by three principles, helping to ensure process doesn't deflect from the achieving of project goals:

- > **Pragmatism** – success is not delivered through dogma and theory. We believe that success is ultimately underpinned by action grounded in the real world
- > **Client-tailored** – there is no such thing as an 'off-the-shelf' solution. We believe in the fundamental value of applying common sense to individual client situations
- > **Result-focused** – we believe in providing concrete, tangible and long-lasting solutions to your biggest challenges

R. P. Delio & Company have been **Engineering Program Success** since 1989; with us as your partner your vision for transformation can, and will, be made real.
